Professional Summary

Full Stack Engineer with 3+ years of experience building scalable, secure web applications using React.js, Vue.js, Node.js, Express.js, Laravel, Java, and Spring Boot. Experienced in RESTful and GraphQL APIs, real-time features (Socket.io, Firebase), MySQL, MS SQL Server, and Redis, with SQL optimization that cut response times by up to 40%. Skilled in Docker, secure coding (OWASP), and AI-assisted development.

Technical Skills

Languages: JavaScript (ES6+), Java, Python, PHP, Kotlin, SQL, HTML5, CSS3
Frontend: React.js, Redux, Vue.js, Vuex, Material-UI, Tailwind CSS, Responsive Web Design, Reusable Components, Figma-to-Code
Backend: Node.js, Express.js, Laravel, Spring Boot, RESTful APIs, GraphQL, Socket.io, AJAX, Promises, Asynchronous Programming, JSON
Databases: MySQL, MS SQL Server, Redis, Firebase, Relational Database Design, SQL Query Optimization
Integrations: Stripe, PayPal, Firebase Cloud Messaging, Third-Party API Integration
Security: Secure Coding Practices, OWASP ZAP, Burp Suite, Application Vulnerability Assessment
DevOps & Tools: Docker, RustDesk (Secure Remote Access), Git, GitHub, NPM, Yarn, Vite, Postman, VS Code, IntelliJ IDEA, Eclipse, Figma
AI-Assisted Development: Claude AI, Prompt Engineering, AI-Assisted Debugging, Code Review, and Documentation

Professional Experience

Assistant Programmer Apr 2026 – Present
Innefu Labs Pvt. Ltd. (Client: National Investigation Agency) *New Delhi, India*

- Develop and maintain secure enterprise applications using Java, Spring Boot, Python, and MS SQL Server to support data-driven investigative workflows.
- Design and implement RESTful APIs and backend services that power frontend integration, data retrieval, and core business logic.
- Write and optimize SQL queries against relational database schemas to retrieve, process, and manage application data efficiently.
- Diagnose backend and database issues through root-cause analysis and ship fixes that improve application reliability and maintainability.
- Perform application security assessments with OWASP ZAP and Burp Suite and apply secure coding practices to remediate vulnerabilities.
- Containerize application services with Docker and use Redis for caching to improve performance and deployment consistency.
- Configure and manage secure remote connectivity using RustDesk within a high-security, access-controlled environment.
- Collaborate with cross-functional teams to plan, build, and deliver application enhancements.

Full Stack Developer Oct 2023 – Mar 2026
Singsys Pte Ltd *Lucknow, India*

- Built and shipped responsive full stack web applications using React.js, Vue.js, Laravel, Node.js, Express.js, and MySQL across e-commerce, edtech, and community platforms.
- Designed and integrated RESTful and GraphQL APIs, enabling reliable communication between frontend applications and backend services.
- Created reusable React and Vue components with Redux and Vuex state management, improving UI consistency, maintainability, and responsiveness.
- Implemented real-time features, including chat, notifications, and live data updates, using Socket.io, Firebase, AJAX, and Promises.
- Integrated Stripe and PayPal payment gateways and order-tracking workflows for an e-commerce platform; optimized database queries to improve query performance by 30%.
- Improved delivery speed by 20% by streamlining development workflows; managed frontend build tooling with Vite, NPM, and Yarn.

Software Developer May 2023 – Sep 2023
Easemyroom *Lucknow, India*

- Resolved 50+ software defects by analyzing application behavior, identifying root causes, and implementing tested fixes.
- Optimized SQL queries, reducing API response time by 40% and improving database-backed application performance.
- Partnered with senior engineers on UI/UX enhancements, contributing to a 22% improvement in user experience scores.
- Converted Figma designs into responsive, reusable UI components, improving interface consistency and usability.

Projects

Shivam Yoga – E-commerce Platform | *React.js, Redux, Material-UI, Laravel, Express.js, GraphQL, Stripe, PayPal, Firebase* Jun 2024 – Mar 2026

- Developed an end-to-end e-commerce platform with product catalog, checkout, Stripe/PayPal payments, and order tracking.
- Built dynamic GraphQL APIs for product filtering and order tracking; optimized database queries, improving performance by 30%.

Lernio Edutech | *Java, Spring Boot, React.js, Firebase, Socket.io, Jetpack Compose* Aug 2025 – Mar 2026

- Developed RESTful APIs with Spring Boot and integrated backend services with a React.js frontend.
- Implemented real-time updates with Socket.io and cross-platform features shared across web and Android clients.

SQ-Web | *Vue.js, Vuex, Laravel, Firebase, Socket.io* Dec 2023 – Mar 2026

- Developed real-time chat and volunteer management modules by integrating Vue.js components with Laravel backend services.
- Integrated Firebase push notifications and improved UI performance and application scalability.

EveryNation Admin Platform (Backend) | *Laravel, Firebase, Socket.io, Jetpack Compose* Dec 2023 – Mar 2026

- Built and maintained backend modules for content management, reminders, and event management.
- Improved application performance and memory usage and developed analytics-related functionality.

Education

Goel Institute of Technology and Management Lucknow, India
Bachelor of Technology in Computer Science, CGPA: 8.29/10 *Oct 2020 – May 2023*

Government Polytechnic Lucknow, India
Diploma in Information Technology, 77.9% *May 2017 – Oct 2020*

Certifications

O Level Certification: NIELIT (National Institute of Electronics and Information Technology), Jul 2018 – Aug 2019
Summer Training in Python: CETPA Infotech Pvt. Ltd., Jun 2019 – Sep 2019
